AADARSH THAKUR

Full Stack Developer

Delhi, India | thakuraadarsh1@gmail.com | +91 9310574300 | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience building production-grade web applications including business management systems and AI-powered platforms. Proficient in designing scalable REST APIs, implementing JWT-based authentication, role-based access control, and integrating cloud backends using Node.js, Firebase, and Supabase. Proven track record of optimizing database performance by 20–30% and delivering end-to-end features that reduce manual effort and improve operational efficiency.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST API Design
Cloud & BaaS: Firebase (Auth, Firestore, Cloud Functions), Supabase
Databases: PostgreSQL, MongoDB, Firestore
Tools & DevOps: Git, GitHub, Vercel, JWT Authentication, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Full Stack Developer | Ash-Tech Solutions *Jan 2026 – Present*

- Designed and implemented RESTful APIs with input validation, JWT authentication, and middleware for secure and scalable data processing
- Implemented role-based access control (RBAC) using JWT and Firebase Auth, securing multi-user application workflows
- Optimized PostgreSQL and Firestore database queries, improving application performance by approximately 20–30%
- Built and delivered full-stack features using React.js integrated with Node.js/Express backend APIs
- Architected scalable cloud-based backend systems using Firebase Cloud Functions and Supabase

Backend Developer Intern | Ash-Tech Solutions *Jul 2025 – Jan 2026*

- Developed production-ready REST APIs using Node.js and Express.js with structured error handling and validation
- Built serverless backend systems using Firebase Cloud Functions, reducing infrastructure overhead
- Integrated Supabase (PostgreSQL) for relational data storage with efficient query design
- Implemented robust API validation and error-handling strategies ensuring high data integrity and system reliability

PROJECTS

Escrow Business Management System *Dec 2025 – Mar 2026*

- Built a full-stack platform to manage clients, invoices, inventory, and daily financial ledger records
- Designed REST APIs and middleware layers for secure data handling and role-based access control
- Implemented QR-based billing system to automate product scanning and invoice generation, reducing billing time
- Structured a normalized database schema supporting future integration across billing, inventory, and ledger modules
- Digitized manual record-keeping workflows, significantly reducing manual effort and improving data accessibility

Taliwo.com – AI-Powered Career Platform *Jul 2025 – Dec 2025*

Live: https://taliwo.com

- Developed an AI-powered system for automated resume and LinkedIn profile analysis with structured feedback and optimization suggestions
- Designed backend APIs to process user input, integrate third-party AI services, and persist analysis results
- Implemented Firebase Auth and Supabase for secure user authentication and multi-user workflow management
- Optimized real-time data handling pipeline to support scalable concurrent usage
- Enabled measurable improvement in resume quality and job application readiness for end users

EDUCATION

B.Tech – Computer Science Engineering *2021 – 2025*

G.L. Bajaj Group of Institutions, Greater Noida

CERTIFICATIONS

- Python Programming – CutShort (Feb 2025)
- Machine Learning – CutShort (Feb 2025)
- Data Science – Google Launchpad
- AI & Machine Learning – AICTE EduSkills
- Web Development – Bharat Intern

ACHIEVEMENTS & PATENTS

- ITS Codeathon – 4th Place finish among competing teams
- Patent Published: A Luggage Security System Based on GPS (2024)
- Patent Published: Agricultural Management Device (2024)

LANGUAGES

- English – Professional Proficiency
- Hindi – Professional Proficiency
